## T-Rex Fuel Tank Classic

No more batteries to change. No more tangled cables to trip over. The FuelTank Classic is the perfect power supply unit for guitarists who want to focus on their performance, not their gear. Delivering 1.500 mA through ten DC plugs, the FuelTank powers all your pedals – keeping you running on full power night after night.

With a compact design, the FuelTank Classic fits conveniently on any pedalboard and it comes with all the cables you need to get you up and running. Two of the ten outputs provide 12-volt power with isolated ground – one DC and the other AC, for AC pedals.

Each Fuel Tank Classic includes one 5-connector link cable/daisy chain for the DC outputs, 8 black extension cables for the DC outputs, 10 black extension cables for the DC outputs, 2 red extension cables for the 12-volt AC output and 1 standard power cable.

### Features:

- MAINS input power plug, 3-pin standard plug
- Voltage selector, 115/230 volts
- Eight 9-volt DC output plugs, all sharing the same ground. Giving a total of 500 mA
- One 12-volt DC output with isolated ground, giving 500 mA
- One 12-volt AC output with isolated ground, giving 500 mA
- Blue LED when unit is ON
- Slow burning fuse 250V 250mA
